

Signature Line

Crafted for global brands.

The Catalog · 2026 Edition

OEM · ODM · PRIVATE LABEL KOLKATA, INDIA

SSS GLOBAL APEX

We don't sell leather goods.

RevatiCraft is the leather-goods export arm of SSS Global Apex, a Kolkata-headquartered manufacturing group built around a single discipline: doing the same thing, consistently, for fifteen years.

We build the product your brand will be judged on.

We make OEM, ODM, and private-label leather goods for fashion houses, retailers, and brand owners across thirty countries.

This catalog is not a price list. It is a reference for what we can build with you, what we will not build for anyone, and how we prove the difference.

Built to ship.

A new merchant export house, set up with buyer-grade systems from day one.

The world's leather cluster you haven't mapped yet.

Sixty percent of India's leather-goods exports move through Kolkata. Ninety percent of India's industrial leather gloves. Two hundred and twenty-four tanneries operate in the Bantala Leather Complex alone. More than twelve hundred fabricators work across Kasba, Topsia, and Tangra.

Modern leather processing began here in 1920. Bata anchored industrial manufacturing at Batanagar in 1936. The cluster is older than most of the brands we supply. RevatiCraft sits inside this cluster. We source hides, tan, finish, fabricate, and export within a forty-kilometre radius. That is not a convenience — it is a compounding quality advantage.

OUR NEIGHBOURHOOD, AT A GLANCE

TANNING & FINISHING

Bantala (LWG-audited) · Chrome / Chrome-free / Vegetable-tan

LEATHER GOODS FABRICATION

Kasba · Topsia · Tangra · 236 exporters · 1,200+ fabricators

SPECIALISED CLUSTERS

Belegghata (gloves) · Batanagar (footwear) · 26% of India's tanneries

Consistency is the real luxury.

Any workshop can produce a single beautiful bag. The test of a manufacturer is the five-thousandth unit off the line matching the sealed sample — in colour, in temper, in stitch density, in edge paint, in zipper feel, in weight.

At RevatiCraft, consistency is the engineering problem we solve. Material traceability. Batch references. First-piece inspection. Sealed-sample workflows. AQL 2.5 on major defects, 4.0 on minor. Chromium VI tested on every shipment.

Your customer never sees the spreadsheet. They just feel that the bag they bought last Christmas feels like the one they bought last week.

What we do, in one spread.

01

OEM • ODM • Private Label

Your brand, your spec, or our design team's interpretation.

02

Seven product categories

Handbags • Wallets • Backpacks •
Crossbodies • Travel • Laptop • Stationery.

03

Three tannages, six leathers

From concept to carton — five controlled steps.

Every step produces a document. Every document is yours on request.

Built to deliver. Market by market.

A merchant export house built around quality control, traceability, and buyer-grade documentation.

HOW WE EARN THE ORDER

Material sourcing	Full-grain leather sourced from CLE-listed Kolkata tanneries with traceable hide records.
Three-stage QC	Inbound check on hides, in-process check at the manufacturing unit, and 100% pre-shipment inspection.
Sample-first model	Every relationship starts with an approved sample. No order ships without your written sign-off.
Third-party PSI	SGS, Bureau Veritas, or QIMA on request — independent verification before container loading.
Buyer-grade docs	Pro-forma, commercial invoice, packing list, COA, test reports, and origin certificates issued in your format.

Quality you can trace. Documentation you can claim.

WHERE WE'RE FOCUSED — 2026

USA	Primary market. 75-80 day production. Sample-first commercial model. FOB Kolkata or CIF US East/West Coast ports.
UK	Active development. Preferential origin under the India-UK FTA available for qualifying SKUs (see below).
EU	Open for inquiries from Germany, France, Italy, Netherlands. Full-grain Kolkata leather with full documentation.
MENA	Open for retail and corporate gifting. Partnership-first commercial structure.
APAC	Open for SEA and ANZ inquiries on a project basis.

INDIA-UK FTA · HS 4202

Tariff phase-down on HS 4202 leather goods begins 2026.
Preferential origin available where the SKU clears the RVC threshold.
Per-order saving sized on quote, against the actual MFN line and unit value.

Some things we'd rather pass on.

A catalog usually argues what a supplier can do. This is the short page about what we won't — easier to know upfront than discover six weeks into a sample round.

Bonded or synthetic “leather.”

We work in full-grain only. Bonded and PU alternatives go to other suppliers.

Unaudited tanneries.

Every hide traces back to a named, documented partner.

Orders without a spec sheet.

A handshake isn't a specification.

Sub-100-unit one-off runs.

We're built for repeat orders, not novelty.

Price-first transactions.

If cheapest is the only criterion, we are not the answer.

We'd rather be clear than convenient.

How the first order starts.

To begin, send us a tech pack, a reference sample, or a description of the product you want to build.

If it doesn't pass me, it doesn't leave Kolkata.

"I built RevatiCraft because the brands I admire deserved a partner who cared about the five-thousandth unit as much as the first.

Every shipment passes my eye before it passes yours. Send a brief. The phone below is mine — I answer it."
